

## **NOTICE OF CONSTRUCTION**

Lac La Biche Hamlet  
Shoreline Erosion Protection

### **Dear Property Owners/Residents:**

Lac La Biche County, V3 Companies of Canada and Martushev Logging Ltd. will soon begin work in Lac La Biche Hamlet. This project includes the removal of the aged sheet pile wall that runs intermittently along the Lac La Biche Lake shoreline between 103 Avenue and 101 Street area. Rip rap (rocks) will be placed in areas where the sheet pile wall is removed to provide the shoreline with resistance to erosion and increase the natural feeling of the shoreline. The project team will complete their work from the lake ice and access the lake from the Churchill Drive and 99 Street boat launch access points. A diagram of the work area is attached.

**Timeline:** January 25, 2024 to April 30, 2024 (weather permitting)  
**Scope of Work:** Sheet pile wall removal and rip rap (rock) installation at the shoreline between 103 AV and 101 ST inclusive.  
**Hours of Work:** 7:00 a.m. to 7:00 p.m. (Monday to Saturday)

### **Impact to Residents and Local Traffic:**

- Street level sidewalk access will remain open on Churchill Drive.
- Restriction to shoreline access along work areas and haul routes.
- Regular haul truck movement throughout the hamlet.
- Traffic control during construction at access points.
- Noise and presence of construction equipment/traffic during work hours.
- Waste & Recycling and Utility services will not be affected.

Please respect all construction signage and barricades and ask that the public stay clear of the work area and haul routes along the shoreline.

We appreciate your patience and cooperation as we complete this important work. If you have any questions or concerns, please contact:
