

**NOTICE OF CONSTRUCTION UPDATE
CAMPSITE ROAD – GRANULAR BASE COURSE, ASPHALT CONCRETE PAVEMENT AND OTHER WORKS**

Dear Property Owners/Residents:

Lac La Biche County is committed to enhancing our infrastructure. We are pleased to announce the commencement of the Campsite Road Improvement project. This essential work will involve upgrading the Campsite Road to improve safety, drainage, and overall road quality.

Timeline: May 19, 2026, to September 2, 2026 (Weather Permitting)

Scope of Work: The project includes ditch improvement, culverts removal and installation, approach improvements, removal of existing subgrade, subgrade preparation, granular base course, asphalt installation, line painting, and seeding.

Hours of Work: 7:00am to 7:00pm (Mondays to Saturday)

9:00am to 6:00pm (Sundays and Holidays)

Large trucks will be hauling material from the existing construction site to the stockpile site along Campsite Road and predetermined haul routes.

A map of the general location and work area is attached. Construction signs, and/or safety messages will also be installed.

Knelsen Sand and Gravel Ltd. will work diligently and effectively to keep public safety as the top priority and complete the work within schedule.

Impact to Residents and Local Traffic:

- Construction activities might cause disruption to the public traffic. To complete this work lane closures will be required. However, one open lane will always be maintained so that traffic can travel through the work zone.
- Heavy equipment and truck traffic moving in and out of the work site.
- Residents and passing traffic are advised to be cautious of the heavy equipment working on site.
- A dedicated site person may be assigned to guide the public and traffic, as required.
- Garbage pick-up will continue normally, and we request that you bring your garbage to the end of your driveway to ensure pick-up is not missed.
- Signs and safety messages will be installed prior to the start of construction and will be monitored throughout the construction period.
- Dust control procedure will be in place during construction.

Special Instructions for Residents and Local Traffic:

Please be mindful of all installed construction signage and safety messages. Maintain a safe distance from construction work and do not enter marked, flagged or barricaded areas. Always follow traffic directions from all crew personnel during construction operations. It is important to note that there will be a time gap between completion of the gravel base and paving operations. We anticipate having all asphalt paving completed towards the end of the project. For questions/clarifications regarding the limits of paving for driveways, please call Roam Thorsteinsson at 780-293-9561.

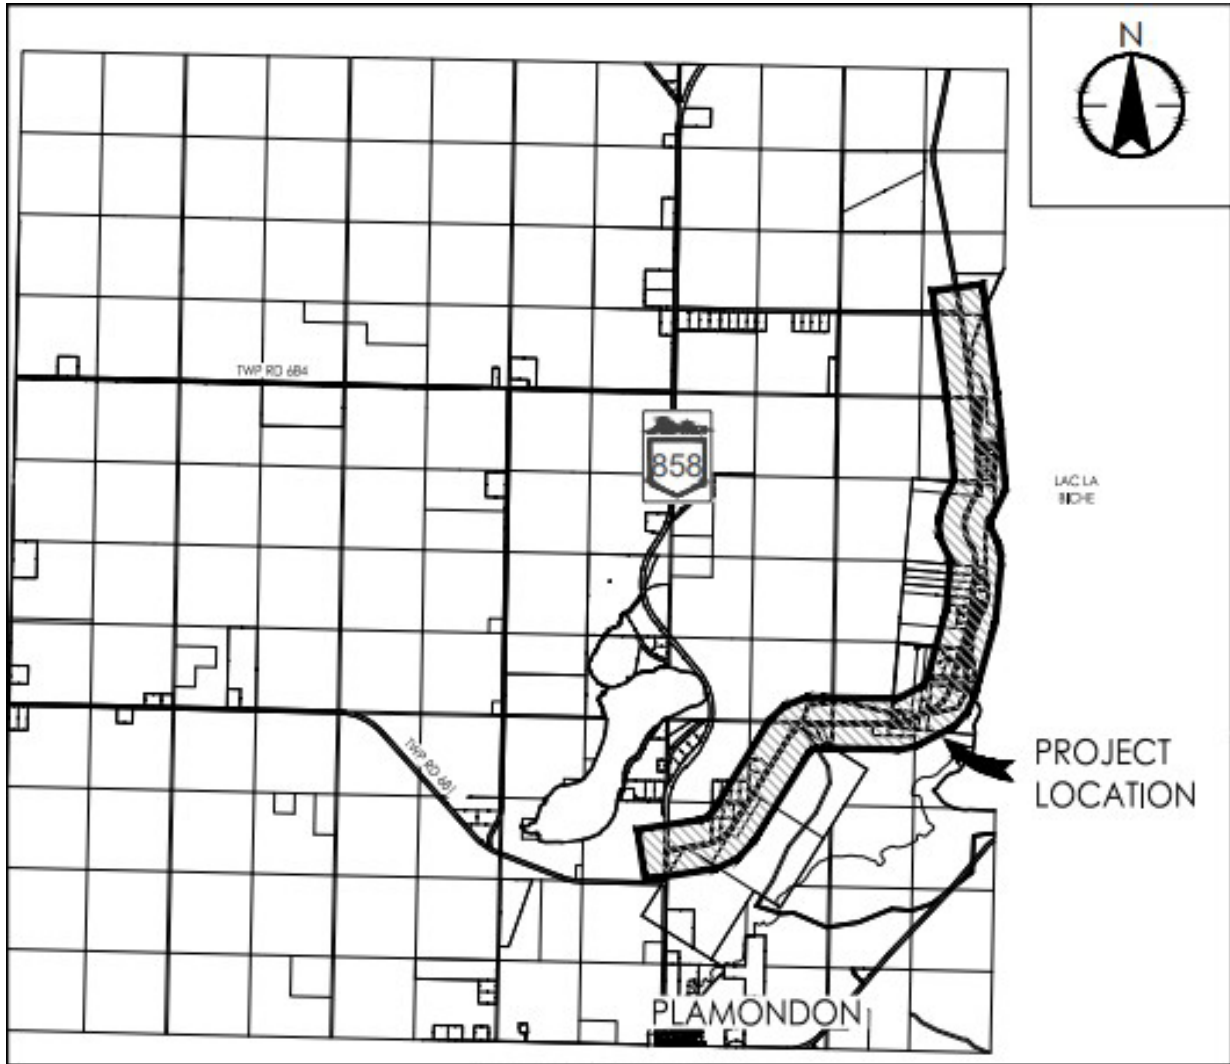

Knelsen Sand & Gravel Ltd. will take every precaution to ensure public safety and will need your assistance in keeping children and pets at a safe distance from the construction site, staff, and equipment.
