Christmas Tree Recycling

Start the New Year by recycling your Christmas tree. From January 2-13, residents who receive curbside pickup service can call **(780) 623-6739** to have their trees picked up and recycled. If you don't receive curbside service, or if you miss the deadline, you can bring your tree to any County landfill or transfer station at no charge.

Only natural trees will be accepted, and trees must not have any decorations left on them. For every tree that we recycle, a new one will be planted in a local park.

Green Rebate Program

The County wants to reward residents who take steps to consume less water and energy. Whenever you buy certain Energy Star or WaterSense-certified appliances, you could earn some money back. Please call the County's Utilities department at **(780) 623-6730** for more details.

ELIGIBILITY CRITERIA

- 1) You must be a resident of Lac La Biche County.
- 2) Your purchase must have been made between January 1, 2022 and December 31, 2022.
- 3) Your appliance must be an Energy Star or WaterSense-certified item from the following categories:

Category	Rebate
Clothes washer	\$100
Dishwasher	\$75
Water heater	\$150
Furnace or boiler	\$400
Low-flush toilet	\$50

2023 Green Rebate Program applications need to be submitted no later than January 20, 2024.

What Goes Where? A new online service

Can I recycle this? Will the landfill accept this? We've all had these questions when disposing of an item. Lac La Biche County has launched a new online service. You can now search for specific materials to determine if they should be recycled or not, and where to take them: laclabichedcounty.com/p/what-goes-where.

Farm Animal Health

The Veterinary Services Inc V.S.I. program offers County residents subsidization on certain veterinary services. Email agriculture@laclabichedcounty.com, call **780-623-6739** or go online to our website to fill out the application.

Not Just A Landfill

Did you know that we recycle styrofoam, electronics and more at our landfills and transfer stations? Flip to the back of this calendar for a breakdown of what goes where for both curbside pickup customers and landfill/transfer station users.

New! To search where to dispose of different items, visit our website at laclabichedcounty.com/p/what-goes-where.

Did You Know?

Residents can recycle small amounts of used automotive oil at any County landfill or transfer station.

Commercial oil producers, or people with large amounts to recycle, can call **(780) 623-6739** to find out more about their recycling options.

Fire Season Begins

Permits are required for all burning except campfires from March 1 to October 31. Burning and campfires alike are prohibited when fire bans are announced. This is to protect you, public safety and the natural environment. Please call **(780) 623-6767** to ask about permits, what you can and can't burn, and more.

Burning Waste: Not Just A Fire Hazard

It's against the law to burn waste in Lac La Biche County, and it can harm you and the environment. Burning waste releases pollutants and toxic substances that can end up in the air, water and soil, affecting plants, animals and people.

Remember that local residents are allowed to bring up to 500 kg. (about 1,100 lbs.) of waste to a landfill or transfer station at no charge. Disposing of waste properly, rather than burning it, is a much healthier choice for you, your family and future generations.

Community Garden

The Community Garden in Alexander Hamilton Park has 40 plots available for residents to grow their own plants and produce. You can apply for a plot in-person at the County Centre office on Highway 881, or download the form from the County website and email it to green@laclabichedcounty.com.

New for 2022

Gardeners have the option to pay \$20 for a raised bed plot!

Applications for plots will be accepted from April 1 to June 1.

Put Down Roots

Starting April 1, you can order bundles of tree seedlings through our Environmental Services department. They're great for beautifying your property, growing a shelterbelt or just adding to the environment in your area.

Agriculture Equipment

Farming is a lot of work, so let us help you get the job done in the safest and most environmentally friendly way possible. You can rent agricultural equipment from the County, including some items that are not commercially available. Items range from air seeders to live animal traps. Visit the County's website for a breakdown of rental rates.

If you own more than 80 acres of agricultural land or a pesticide applicator license, you can also buy agricultural pesticides and herbicides from the County. Call (780) 623-6739 for details.

Aquatic Invasive Species

Boating season starts this month, so it's time to keep your eyes open for aquatic invasive species. Non-native plants and animals, like zebra mussels and flowering rush, can attach to watercraft and "hitchhike" between water bodies. That's why it's important to clean, drain and dry your watercraft every time it leaves the water.

Not-so-fun fact: Flowering rush spread through Isle Lake in Alberta over two years. If left unchecked, the plant can completely infill bodies of water.

Environmental Stewardship Awards

Did you know we just launched the Environmental Stewardship Awards, to recognize community members who go the extra mile to take care of our environment? Visit our website for more information.

There are 4 cash prizes of \$500!

Roadside Spraying and Mowing Program

The County controls noxious and prohibited noxious weeds on all public properties including roadsides using an integrated approach. This includes the use of broadleaf herbicides. In addition to chemical weed control, roadside mowing is done from June to October, weather permitting. In the last two years, more than 5000 km of roadside vegetation was mowed.

Environment Week

Environment Week is a time to think about and improve our relationships with the land, air and water. Stay tuned for details about Environment Week events happening from June 4 to June 10.

CORE Program

Did you know as much as 30% of the average household's waste is organic? With the Community Organics Recycling Enhancement (CORE) program, it's easy to learn how to compost and reduce the amount of waste going to landfills. We teach people the basics of backyard composting and provide them with free supplies to get started. Keep an eye on the County's website and Facebook page for free upcoming workshops.

Last year, program participants kept over 4,000 lbs. of organic waste from going to landfills!

Controlling Clubroot

Clubroot is a common soil-borne disease that affects plants like canola. Over time, the disease will stunt a plant's growth and eventually kill it. To limit the spread of the disease, the Alberta Clubroot Management Plan recommends taking steps like sanitizing farm equipment, rotating crops and growing disease-resistant crop varieties.

Lac La Biche County has a new Clubroot Management Agreement Plan for affected producers. If you suspect clubroot is in your fields, call (780) 623-6739 or email green@laculabichedecounty.com to find out what you can do, and how we can help.

Rural Beautification Award

We like to recognize rural residents who go above and beyond to make their properties look good and responsibly contribute to the environment in their area. Every year, residents living outside the hamlets of Lac La Biche and Plamondon can be nominated for the Rural Beautification Award. All nominations must be received by July 31. For information on nominating, please visit our website or call **(780) 623-6739**.

Mad About Science!

We offer a day camp for youth who are interested in learning more about environmental science through games and activities.

Watch for the Mad About Science logo for camp dates in this calendar! Locations and times will be publicized on County media.

Did You Know?

Lac La Biche County has been recognized by the Alberta Recycling Management Authority as a 2022 Collection Site Award of Excellence Winner. Winners are chosen annually for exceptional dedication to meeting all collection site requirements, and for running sites that are organized, convenient and safe for residents and businesses to use.

Riparian Areas

Our County is full of what are called riparian areas. These are areas that border bodies of water like lakes, rivers and wetlands.

Riparian areas are considered healthy when they are left in their natural states, with native vegetation. The vegetation acts as a buffer by filtering runoff that enters the water, controlling erosion and flooding, providing habitat and food for wildlife, and more.

Do Your Part To Prevent Blue-Green Algae

Blue-green algae occurs naturally in our lakes, but human activity can have a big impact on the frequency and severity of algae blooms. There are ways you can help keep the unpleasant blooms to a minimum.

- Don't pour anything into a storm drain. Anything that goes down the storm drain eventually ends up in a nearby water body.
- Avoid using unnecessary excessive fertilizers, pesticides and other products on your property. These can enter water bodies as runoff.
- Leave shorelines in their natural states. Native vegetation along shorelines is vital in filtering runoff.
- If you have a septic system, check it regularly to make sure it isn't leaking and empty it often.
- Take steps to keep cattle and other livestock away from lakes and rivers. See *Alternative Watering Systems in September*.

Did You Know?

In 2021, the Lac La Biche Watershed Management Plan was updated, with action items from the plan being implemented by the committee. The plan is used to guide our stewardship of the lands and waters that drain into Lac La Biche Lake.

You can see the updated Watershed Plan on the County website.

Alternative Watering Systems

Take steps to keep cattle and other livestock away from lakes and rivers. Grazing degrades the shoreline, and animal manure increases nutrient levels in the water. Help keep our riparian areas and water bodies healthy.

Call **(780) 623-6739** for information about alternative watering systems.

Waste Reduction Week

Waste that ends up in a landfill will be there forever, it will never go away or be moved, so it's important to divert as much waste from landfills as possible. Stay tuned for details about Waste Reduction Week events happening from October 16-22.

Recycling Contamination

There are some things in life that just don't mix. Waste and recyclables are a perfect example. Recyclables, like clean plastic and cardboard, are considered contaminated once they've been mixed with waste. That means it may be more difficult, or even impossible, to properly sort and process them. A recent County waste and recycling audit showed at least 35% of what goes into curbside recycling containers is actually misplaced waste.

Curbside recycling volumes

The Agricultural Service Board

The Agricultural Service Board is a group consisting of 2 Council members and 3 members-at-large from different areas in the County who are committed to ag-related programs, services and concerns.

To reach out, contact:
agriculture@lactalabichcounty.com.

Green Cones

We now sell Green Cones, which harness the power of the sun to break down and digest food waste, including some items like bones that can't be composted. If you use it correctly, more than 90% of what you put in it will be absorbed by the surrounding soil. Call **(780) 623-6739** to find out more!

Agricultural Recycling

The changing colours mean it's harvest season. You can take plenty of agriculture-related waste to a landfill or transfer station to be recycled. We accept empty pesticide and herbicide containers that have been triple-rinsed and have holes poked in the bottoms. We can also recycle bundled plastic like grain bags and baling twine.

WASTE

Silage wrap

Grain Bag Plastic

RECYCLE

Bale Twine
Must be unknotted and placed in clear plastic bags, tied close.

Tires

Lubricating Oil, Oil Filters, and Oil Containers

Empty Non-Hazardous Aerosols

Metal, Car Parts, Appliances

Paint and Finishes

Styrofoam
Only clean white #6 Styrofoam.

Electronics & Batteries
Please keep lithium batteries separate.

NOTE:

Pesticide and fertilizer containers under 23L are no longer accepted for recycling at our landfills and transfer stations. To recycle the containers, please return them to the retailer where purchased.

Christmas Eve	31					
New Year's Eve						
	Christmas Day	Boxing Day				

Ecofriendly Holidays

The holiday season is a time to celebrate and give, but if you're not careful, it can also be a very wasteful time of year.

If you have Christmas lights, use a timer to control when they turn on and off. Send greeting cards electronically, and don't be afraid to reuse wrapping paper, ribbons and other packaging. Did you know that wrapping paper can be recycled as long as it's non-metallic?

If you have lots of leftovers or unwanted items from holiday gatherings, consider giving them to local shelters or charity organizations, or utilizing the Reuse Centers located at any one of our Transfer Stations or Landfills.

Why Are We All About Recycling And Composting?

One of our goals is to greatly reduce the amount of waste going into our landfills. Landfills run out of space over time, so we need to reduce, reuse and recycle as much as possible.

This calendar was printed on recycled paper, and you can recycle it all over again when you're done!

Are you putting up a natural Christmas tree this month? Don't just get rid of it right after the holidays. Take advantage of the County's free Christmas Tree Recycling program in January.

What Goes Where?

RECYCLING

CURBSIDE PICK-UP

PLASTIC (CLEAN)

- Hard/rigid household bottles and containers (e.g. shampoo, margarine, yogurt, labels are okay)
- Stretchy plastic bags, combine into one bag and tie closed

PAPER & CARDBOARD (CLEAN)

- Newsprint and paper (not shredded)
- Magazines and paperback books
- Gift wrap (non-metallic)
- Cardboard boxes (flattened), and box board (cereal boxes, etc.)
- Pizza boxes with food and paper liner removed
- Hardcover books can be recycled once the cover is removed

HOUSEHOLD METAL (CLEAN)

- Cans (labels are okay) and lids
- Aluminum trays
- Metal coffee cans

REDEEMABLE ITEMS

The following can also be redeemed for deposit at the recycling depot:

- Milk jugs and cartons
- Tetra-paks (juice boxes)
- Pop/beverage bottles, plastic only
- Pop/beverage cans
- Coffee creamer bottles

RECYCLING AT LANDFILLS & TRANSFER STATION

PLASTIC

- All plastics as listed in the curbside recycling column.
- Agricultural twine (unknotted in a clear plastic bag, tied closed)

MIXED PAPER AND CARDBOARD

- All clean paper and cardboard as listed in the curbside recycling column.
- Shredded paper (must be in clear plastic bag)

APPLIANCES AND METAL

- Household metals such as aluminum trays and cans, or metal coffee cans.
- BBQs, lawnmowers, tools, refrigerators, etc.
- Fire extinguishers and propane tanks (emptied and vented)

CEMENT, ASPHALT, SOIL, GRAVEL

(landfills only — call prior to disposal)

AUTOMOTIVE AND MOTORIZED

- Tires (no tracks)
- Car parts or ATVs must have batteries and fluids removed

WOOD (no nails)

- Wood chips, stumps, brush, pallets
- Keep painted or treated wood items separate

LIGHTING

- Fluorescent tubes/ballasts, compact fluorescents, halogens, etc.

PAINTS, STAINS AND FINISHES

ELECTRONICS

- Anything with a cord or battery (including cellphones)
- Ink cartridges

BATTERIES

- All battery types must be kept separate and stored in their original packaging, or in a plastic container (not metal)
- It is recommended to add electrical tape to the terminals on the batteries to avoid hazards such as fires.

OIL PRODUCTS (no cooking oil)

- Lubricating oil, free of contaminants
- Oil filters and containers

PESTICIDES AND FERTILIZERS

- Triple rinse containers, remove caps

GLYCOL AND ANTIFREEZE

STYROFOAM

- Only clean, white #6 Styrofoam, must be rigid
- No packing peanuts or food containers

WASTE

CURBSIDE PICK-UP, LANDFILLS & TRANSFER STATIONS

NON-RECYCLABLE PLASTIC

- Soiled plastic
- Chip bags and candy wrappers
- Coffee pods and K-cups
- Plastic plates and cutlery
- Plastic film packaging (such as toilet paper packaging or plastic wrap)

NON-RECYCLABLE HOUSEHOLD METAL

- Aluminum foil
- Soiled household metal

NON-RECYCLABLE PAPER AND CARDBOARD

- Soiled paper or cardboard (take-out containers, etc.)
- Tissue, paper towels, laminated paper items
- Pet food bags, flour bags, etc.
- Paper cups (coffee, soda, etc.)

FOOD WASTE

- Table scraps, spoiled food, cooking oil/grease (cooled)
- Meat remains/bones/shells (wrapped in newspaper; no carcasses)

Much of this food waste can go into either a composter or a Green Cone.

NON-RECYCLABLE STYROFOAM

GLASS AND CERAMICS

- Plate glass, mirrors, broken glass (wrapped in paper), food jars
- Incandescent light bulbs

ORGANICS

- Pet feces/cat litter (bagged)
- Cigarette/wood ashes (cold and bagged)

HOUSEKEEPING

- Bathroom waste
- Filters (air, furnace, water, vacuum)
- Vacuum bags and floor sweepings

What about STYROFOAM?

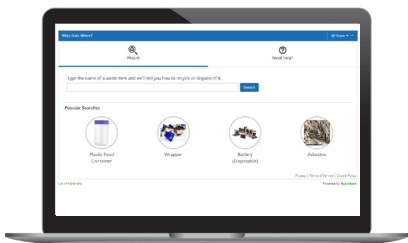

Clean, white #6 Styrofoam, can be recycled at County landfills and transfer stations. It must be rigid and cannot be flexible. Packing peanuts and food containers are not accepted.

Currently, Styrofoam can't be recycled through the curbside pickup program.

What goes where? is now online!

Lac La Biche County now offers help determining what items should be recycled and what is more suited for landfill. Just enter the name of item in our new Search Wizard and it will tell you where you can drop it off and provide directions to the transfer station or landfill.

Give it a try today by visiting our What Goes Where webpage: laclabichcounty.com/p/what-goes-where
