

NOTICE OF PRELIMINARY SURVEY WORK

BEAVER HILL ROAD & 91 AVENUE INTERSECTION IMPROVEMENT

Dear Property Owners/Residents:

This proposed improvement at the Beaver Hill Road and 91 Avenue intersection will include construction of a full right turn lane along Beaver Hill Road from 90 Avenue to 91 Avenue, along with an additional two eastbound lanes along 91 Avenue. The main objective of the project is to improve the intersection's functionality to accommodate current and future development in the area.

As part of the engineering design, Wood Environment & Infrastructure Solutions's (Wood) (Engineering Consultant) two-man survey crew will carry out preliminary topographic surveys including establishment of control, legal pins, alignment, cross sections, project limits, existing right-of-way, existing drainage culverts, drainage structures, approaches, intersections, and utilities. A geotechnical investigation will also be completed, which involves borehole drilling and line locates at specific locations to determine the existing thickness of the road structure and obtain subgrade information.

Future construction, which you will receive a separate notice for, will include excavation, subgrade preparation, base paving (granular base course and asphalt concrete pavement), curb and gutter installation, sidewalk construction, installation of new signs and line painting.

Timeline:	April 23 & 28, 2021
Scope of Work:	Preliminary Surveys and Geotechnical Investigation
Hours of Work:	7:00 a.m. to 7:00 p.m.

Impact to Residents and Local Traffic:

- No delays and traffic interruptions throughout the survey work on April 23, 2021.
- Minor delays and traffic interruptions throughout the drilling work on April 28, 2021.

Survey signs and safety messages will be installed prior to the start of survey work. Wood has committed to operating in a courteous and professional manner. We appreciate your patience and cooperation as we complete this important work. If you have any questions or concerns, please contact:
